This avant-garde international PopUp! festival invites artists from around the world to create works of contemporary art on architecture and locations not conventionally thought of as art platforms, creating unexpected views, beauty and evocative power. In the Esino hills PopUp! tells of the paradise that exists under our very eyes, the marvels of the Earth, beautiful plants, animals, history, people and sky, but also of the paradise that is being forgotten and lost forever. The festival is held in May/June 2015 with four days of events, urban art and land art installations, workshops, tastings and happenings in an itinerary that moves from the Quarry of Arcevia to the Lake of Cingoli, the medieval village of Castelletta and the wineries of the producers the famous wines Verdicchio di Matellica and Verdicchio di Jesi.
